Jordan Lee

jordan.lee@example.com | Kuala Lumpur | (fictional demo resume)

Summary

Retail operations supervisor with 6 years' experience, moving into data analysis. Builds weekly sales and stock reports in Excel, cleans messy point-of-sale exports and presents results to store managers. Currently learning SQL and Power BI.

Experience

Operations Supervisor, Northwind Retail (fictional) | 2022-2026

- Built a weekly sales dashboard in Excel (pivot tables, XLOOKUP, charts) used by 4 store managers.
- Cleaned and merged point-of-sale exports; cut stock-count mismatches by about 30% with a simple validation checklist.
- Ran stock-level analysis to set reorder points for 300 products; presented findings at monthly meetings.
- Supervised and scheduled a team of 9; trained new staff on the till and inventory system.

Senior Sales Associate, Northwind Retail (fictional) | 2020-2022

- Handled customer complaints and returns; kept a log of recurring issues for the store manager.
- Tracked daily targets in a shared spreadsheet and wrote short end-of-week summaries.

Projects

- Personal project: analysed a public bike-sharing dataset in Excel and Python (pandas) to find peak hours; wrote a one-page summary with two charts.
- Online course exercises: basic SQL SELECT, WHERE, GROUP BY and JOIN queries on a sample sales database.

Skills

Microsoft Excel (advanced: pivot tables, XLOOKUP, charts) | data cleaning | reporting | basic SQL | basic Python (pandas) | Power BI (beginner) | presenting results to managers | team supervision | inventory management | customer service

Education

Diploma in Business Studies, 2019 | Google Data Analytics Certificate (in progress)
